

Agenda SAC

Facilitator: **Dr. Chaplain**

Estimated Time	Topic	Lead Person	Method	Notes
5 minutes	Welcome	Dr. Chaplain	Discussion	
10 minutes	DAB Update	Mrs. Williams	Information Sharing	Giving the Board and action or 2. Reviewed all the topics of the year and then distilling down to some actions for the board. E.g. the theme of social emotional learning, should this be in the Board Ends?
45 minutes	Comp Plan Summary &	Dr. Chaplain	Information Sharing & Discussion	Julie shared summary page. Took the full funding (2022students), not the averaging model. Tech- 1996 mill levy, all for technology- not in comp. plan (tech committee). Capacity money to support RidgeWrx, math intervention and Language Arts support. Explained cuts in classified going into next year. Explained not funding Geometry in Construction. Funded MTSS supports this year (interventionist to support literacy, Mind Center, Read Plans). Provided an extra planning period to the intervention class teachers. Freshmen classes have the smallest sizes to support transition. Media Center Tech. moving to the online classes. Posting for a Media Tech. 2 position and creating a team with our technology specialists. Question about teacher chairs-

				Julie explains that isn't in the comp. plan because it from the mill levy override. We have applied for a grant for a full time drug, alcohol, and mental health support person.
10 minutes	Next Year's SAC & DAB Representative	Dr. Chaplain	Discussion & Collection of Interested Members	Julie thanks the members of the SAC who have served. Everyone is invited back if they want to serve. Structure question: agendas, resources, materials that we've shared, has that been helpful? Answer- "best in class". Some schools only meet quarterly, thoughts? Resoundingly not enough... How about 5? Yes. What is the preference of meeting space? Current members like the Media Center. Same location, 5 meetings, same time. Last question- Day of the week? Monday (Don't schedule the 1 st Monday of the month because of conflict with DAB). Topics? Are they good?
	Final Questions & Comments	Open	Open Forum	With school pay up and running, what is the true cost of a kid coming to FRHS? Talk to department chairs about families "donating" back the chords, gowns, caps, stole. Idea to help relationships between counselors, parents and students... some colleges have expectations of what counselors do. But with large caseloads, it's hard. Maybe letting the parents know what the counselors do and what the reality is. Maybe older parents mentor younger parents about how it works and what to do. Managing expectations. Maybe a topic for SAC, maybe

				<p>not, what is it, what are the standards? Can we discuss this as a SAC? We can do a preview of Advisory, the lessons, the standards and the ICAP.</p> <p>“ESS has not been valuable to my students.”</p> <p>Maybe we should beef up the feeder school advertising of the placement test in 8th grade. How do we allow students to demonstrate the knowledge of chemistry specifically. Student had to choose between anatomy and physics this year as a senior.</p>
	Closing & Thank You!	Dr. Chaplain		“It’s the end”.
